

# Illness Report

\_\_\_\_\_ had the following indications of not feeling well today.

1) Children with diarrhea and those with a rash combined with fever (oral temperature of 101° F or higher or under the arm temperature of 100° F or higher) shall not be admitted to the day care center while those symptoms persist, and shall be removed as soon as possible should these symptoms develop while the child is in care.

2) Children need not be excluded for a minor illness unless any of the following exists, in which case exclusion from the day care center is required:

- A) Illness that prevents the child from participating comfortably in program activities;
- B) Illness that calls for greater care than the staff can provide without compromising the health and safety of other children;
- C) Fever with behavior change or symptoms of illness;
- D) Unusual lethargy, irritability, persistent crying, difficulty breathing or other signs of possible severe illness;
- E) Diarrhea that cannot be contained by a toilet or diaper.
- F) Vomiting 2 or more times in the previous 24 hours, unless the vomiting is determined to be due to a noncommunicable condition and the child is not in danger of dehydration;
- G) Mouth sores associated with the child's inability to control his or her saliva, until the child's physician or the local health department states that the child is noninfectious;
- H) Rash with fever or behavior change, unless a physician has determined the illness to be noncommunicable;
- I) Purulent conjunctivitis (pink eye), until 24 hours after treatment has been initiated;
- J) Impetigo, until 24 hours after treatment has been initiated;
- K) Strep throat (streptococcal pharyngitis), until 24 hours after treatment has been initiated and until the child has been without fever for 24 hours;
- L) Head lice, until the morning after the first treatment;
- M) Scabies, until the morning after the first treatment;
- N) Chicken pox (varicella), until at least 6 days after onset of rash;
- O) Whooping cough (pertussis), until 5 days of antibiotic treatment have been completed;
- P) Mumps, until 9 days after onset of parotid gland swelling;
- Q) Measles, until 4 days after disappearance of the rash;

Just a note: Please keep in mind that this policy is in place to keep everyone as healthy as possible. We know sickness is inevitable, but when sick children are brought to the center, all children and staff are placed at risk of exposure. The staff and children truly appreciate your cooperation in this matter.

Thank you for taking the proper steps in keeping everyone healthy as possible!

\_\_\_\_\_ may return on \_\_\_\_\_ @ \_\_\_\_\_ am/pm if symptoms no longer persist.

Director \_\_\_\_\_ Date \_\_\_\_\_

If your child has a fever, they may return after a 24 hr fever-free period without fever reducing medication.
