

**Surprise!** Payday will be tomorrow! A day early!

The next payroll (January 15th check) includes the weeks of December 28th-January 8th. So you'll see your current wage for the remainder of the December days and then your new wage starting Jan. 1.

We are starting to see the effects of Christmas gatherings in classrooms and staff. I would expect it to continue from New Years gatherings as well. Just continue to be diligent on how you are feeling and letting your director know about any symptoms.

Has COVID PAY been extended?

Congress is now letting each employer decide if they want to continue COVID pay and how to move forward.

AS OF NOW, we will be continuing with what I sent out last week.

## Next round of stimulus checks:

\$600 government stimulus checks are being distributed.

We are beyond blessed to still have jobs and not have to stress about what so many Americans are facing right now.

The best way to spend the extra cash depends on **YOUR** situation. You can use it to pay the bills, build a savings cushion, or pay off high-interest credit card debt. At the end of the day, don't be ashamed if you decide to use some of it to treat yourself.

# COVID 19 Vaccinations will be available to us soon.

If you are interested in receiving the vaccine, please let me know ASAP so I can send your info to the Health Department.

Here are the questions they will ask.....

Have you had any other vaccination in the last 14 days?

Are you planning to get any vaccinations 14 days after this one?

It is a two-shot series. Are you available to return in 28 days for your booster shot?

Do you have a history of an anaphylaxis allergic reaction to anything e.g., medication, food, animal that required EpiPen administration or hospitalization?

**IF "YES" NEEDS A DR. ORDER**

Are you on blood thinners?

Are you pregnant, plan to become pregnant within the next two months or breastfeeding? **IF "YES" NEEDS A DR. ORDER**
